

A LIST OF BUTTERFLIES COLLECTED BY DR. A. F. G. KERR
IN PENINSULAR SIAM.

BY E. J. GODFREY, B. Sc., F. E. S.

The majority of the butterflies included in the following list were obtained by Dr. A. F. G. Kerr on inspection trips in Peninsular Siam in the years 1928-30. Those marked with a dagger (†) were obtained by either Mr. H. M. Pendlebury (Systematic Entomologist of the F. M. S. Museums) or myself and are included to form a complete list of all the butterflies which at present are known from Peninsular Siam.

Species marked with an asterisk are new records for Siam and short notes on these are given in foot-notes bearing numbers corresponding with those in the list. Notes on species unmarked will be found in my revised list of the butterflies of Siam¹

The number of species recorded is 292; the total number for the whole of Siam at present being 727. One new species and two new subspecies are included, whilst several other species must be regarded as being very rare.

I take this opportunity of acknowledging my great indebtedness to Dr. Kerr for the trouble he took in collecting for me.

PAPILIONIDAE.

- 1.† PAPILIO HELENA CERBERUS Feld.
2. „ AEACUS THOMSONI Bates.
3. „ SYCORAX GROSE-SMITH.
4. „ VARUNA VARUNA White.
5. „ NEPTUNUS NEPTUNUS Guér.
6. „ COON DOUBLEDAYI Wall.
- 7.* „ ARISTOLOCHIAE ASTERIS Roths.
8. „ CLYTIA CLYTIA Linn.
9. „ MAHADEVA Moore.

1. Journ. Siam Society, Nat. Hist. Supplement, Vol. VII, No. 4, pp. 203-397 (1930).

6. 2 ♂ ♂ : Kaw Libong, Trang, 26. 4. 30.

Distribution : Burma ; P. Siam ; Malay Peninsula.

7. 2 ♂ ♂ : King Panom, Surat, 23. 3. 30.

Distribution : P. Siam ; Malay Peninsula ; Penang.

Replaced elsewhere in Siam by *P. a. goniopeltis* Roths.

10. PAPILIO DEMOLEUS MALAYANUS Wall.
